

PHOTO IMAGING – YEARBOOK PHOTOGRAPHY (1 YEAR)

Students will:

1. Recognize and capture storytelling images that utilize strong elements of composition and complement story content.
2. Identify camera equipment, hardware and software to meet a variety of needs.
3. Explain the operation of different cameras (including features and uses).
4. Explore photo-editing software.
5. Understand the consequences of photo manipulation.
6. Understand and correctly resize an image for a variety of media uses (e.g. correct resolution for print, web or display usages).
7. Demonstrate an understanding of aperture, shutter speed, white balance, ISO and depth of field.
